

Stahls

**Hotronix® Air Fusion IQ™ ,  
Stahls 142082 // SA406**

Art.-Nr.: SA406

- Programmable application settings
- Flexibility in base plate selection
- Freedom of movement and simple, automated operation of the heat press
- Ideal for films that require high contact pressure
- The press automatically swings to the side and can swing back again automatically with the foot pedal
- The contact pressure adjusts automatically
- The stand is height-adjustable and the pressure parameters can be entered using the touch screen
- The base plates are quickly replaceable and textiles can be mounted in a barrier-free manner
- The new IQ-Board of the Fusion series offers many new features besides a larger display and an improved sensitivity when adjusting the press: intelligent troubleshooting and self-diagnosis of the press, ability to generate printing and production statistics to check productivity, unlimited number of storable press-on parameters, production counter, automatic on/off function, F° or C° adjustable, Temperature adjustable up to 220C° (430F°)
- A compressor is required to operate the press: Werther SIL-AIR 50/24, for large quantities and high contact pressures we recommend the Panther 100
- 3/8" (1cm) Silicone rubber

---

mat on base plate

- Made in USA
- Durable and robust
- Scratch-resistant, powder-coated finish
- UL / ULC / CE / RoHS verified
- Specifications: 240 Volt, 3500 Watt, 15 Amp
- Cast, snake-shaped heating element prevents „cold spots"
- 3/4" (2cm) thick, non-stick coated heating plate
- Platinum RTD heating sensor
- 30 years warranty on the heating element
- 5 years warranty on the frame construction
- 2 years warranty on the starboard side
