

Stahls

**Hotronix® Dual Air Fusion
IQ™, Stahls 162908 // SA410**

Art.-Nr.: SA410

- Two separate base plates which ensure an even more efficient and varied workflow
- Allows different settings of time, contact pressure and, if desired, temperature per contact surface
- The A and B workstations may be controlled together or separately
- You can save and recall presets conveniently and easily via the touch screen
- The Laser Alignment System is included exclusively, it offers a precise alignment of the application on the textile by four individually adjustable lasers
- The laser system is connected to the workstations of the press and is controlled via touch screen
- We recommend the use of Hotronix® Dual AirFusion IQ™ only in combination with the Panther 100 compressor
- The new Fusion IQ board offers a larger display and improved sensitivity when adjusting the press as well as many new features: intelligent troubleshooting and self-diagnosis of the press, ability to generate printing and production statistics to check productivity, unlimited number of storable press-on parameters, production counter, automatic on/off function, F° or C° adjustable, Temperature adjustable up to 220C° (430F°), Multiple time settings
- Automatic opening function
- Automatic pressure through

Auto Adjust Pressure™

- Touch screen control
- Fully automatic, semi-automatic and manual operation possible
- Made in USA
- Durable and robust
- Die-cast parts, corrosion-free base and surfaces
- UL / ULC / CE / RoHS verified
- Specifications: 220 Volt, 2250 Watt, 10 Amp, 120 PSI
- Heating plate: Dual quick-release plate, Threadability™, Workplace without direct heat radiation, Two plates, each 40 x 50 cm (16" x 20")
- 30 years warranty on the heating element
- 5 years warranty on the frame construction
- 2 years warranty on the Controlboard
- Premium Warranty
