

Virshields®

**Medical Face Mask Typ II  
(Pack of 50), Virshields®  
VS002 // VS002**

Art.-Nr.: VS002

- 50 pcs Medical Face Mask 3-ply Type II
- Wearing a medical mask has always been one of the recommended protective measures in various environments: in hospitals or clinics, as well as for industrial and other occupational purposes. Nowadays, face masks have become even more relevant in view of the new epidemiological situation worldwide.
- This disposable medical mask consists of three protective layers made of a skin-friendly material and has flexible ear loops.
- Outer layer: protects the user from germs, Inner layer: absorbs moisture, including that released by the user, The filter layer as the most essential layer acts as a barrier against germs
- Suitable for adults
- Manufactured in Europe according to DIN EN 14683:2019. This standard ensures that the production process and testing methods are carried out in such a way that these medical masks limit the potential for transmission of various pathogens.
- This type II mask offers a filtering performance of BFE ≥98% and its outer layer is hydrophobic, i.e. it protects against potentially infectious liquids.
- The fabric used is tested as fire resistance class 1, which

---

guarantees you as a customer  
high fire resistance of the  
material.

- The manufacturer complies with the ISO 13485 quality management system and the ISO-8 clean room, all of which are relevant to the manufacture of medical devices.
- Conformity with CE (93/42/EEC)
- Non sterile
