

Virshields®

**Medical Face Mask Typ IIR
(Pack of 50), Virshields®
VS004 + VS017 // VS004**

Art.-Nr.: VS004

- Medical face mask type IIR according to class I
- Three layers of nonwoven fabric, in the form of spunbond-meltblown-spunbond
- BFE > 98%
- The innermost layer is a nonwoven material that absorbs moisture produced by the wearer.
- The outermost layer is water-repellent to protect the wearer from splashes
- The filter layer in the middle is the most important component of the medical mask, as it is a barrier for germs
- Plastic nose clip (90 mm)
- Ear loops (3.5 mm-4 mm elastic)
- Due to the pleated design, the mask can be flexibly adapted to the wearer's face shape
- According to DIN EN 14683: 2019 + AC: Virshields mask achieved type IIR in 2019
- The Virshields face mask is a single use product
- The product is breathable and the bacteria filter protects the wearer from dust, pollen and pathogens (e.g. droplet infections and respiratory diseases)
- Pack of 50
- Made in Europe
